### ALTITUDE

Always keep your feet firmly on the ground with the altimeter.

### BAROMETER

Don't let yourself get surprised by a storm, stay aware of weather changes thanks to the barometer.

### **COMPASS**

Find you way in the most remote places! The ALPINER**X** compass shows the North direction in real time with the watch's hands.

### **CONNECTED GPS**

The connected GPS records your steps, walks and runs, via the application.

### **UV INDICATOR**

Keep an eye on harmful UV rays

#### with the watch's UV sensor.

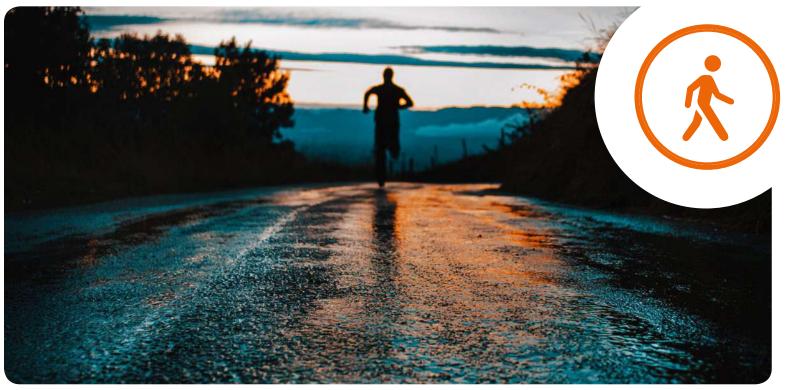

#### TEMPERATURE

Be prepared to face extreme temperatures with your integrated thermometer.

### **ACTIVITY TRACKING**

USER GUIDE

Keep track of your daily activity. Monitor your walks and running sessions with a full log of your course in the app.

### **HEART RATE MONITORING**

Measure your heart rate in all our activities by connecting your sensor to the ALPINA SMARTWATCH app. Optimize your workouts and check your results to improve your performance.

### **DYNAMIC COACH**

Get suggestions, tips, and information catered specifically to you based on your activity and sleep goals.

### **SLEEP MONITORING**

Wear your watch at night or put it under your pillow to record your sleep. The integrated tracking system will provide details on how much time you spent in deep sleep, light sleep, or awake.

**SMART ALARMS** 

Set a smart sleep alarm to help you wake up at the optimal time in your sleep cycle in order to wake-up fully rested. Set an alert to remind you to move if you've been idle for a set amount of time. Customize your Get-Active Alerts in the ALPINA SMARTWATCH app.

(GET-ACTIVE ALERTS, SLEEP ALARM)

#### TIME & NOTIFICATION

**ALPINERX** 

#### **ALWAYS ON TIME & DATE** (HOURS, MINUTES, SECONDS, DATE)

You will never have to set a time and date - travelling across timezones, the ALPINER**X** picks-up the time directly from your smartphone and updates it automatically on your watch.

### CALLS & MESSAGES NOTIFICATIONS

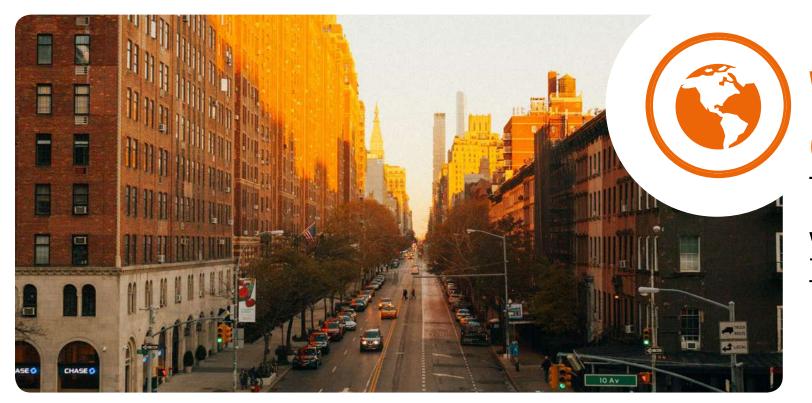

Calls and messages are picked-up by your watch and displayed on the LCD

screen with a soft chime to alert you.

#### **TIME RECORDER** (STOPWATCH, TIMER, WORKOUTS)

Measure and record any event or workout with the many time recording options offered by your watch and app.

### WORLDTIMER

 $(2^{ND} TIME ZONE + LOCAL 12H/24H TIME)$ 

The worldtimer function allows you to display a chosen second timezone (hometown).

**2+ YEARS BATTERY** Your ALPINER**X** is an authentic Swiss

watch and in the purest tradition, yourtimepiece features a connectedcaliber with an exceptional2+ years battery life.

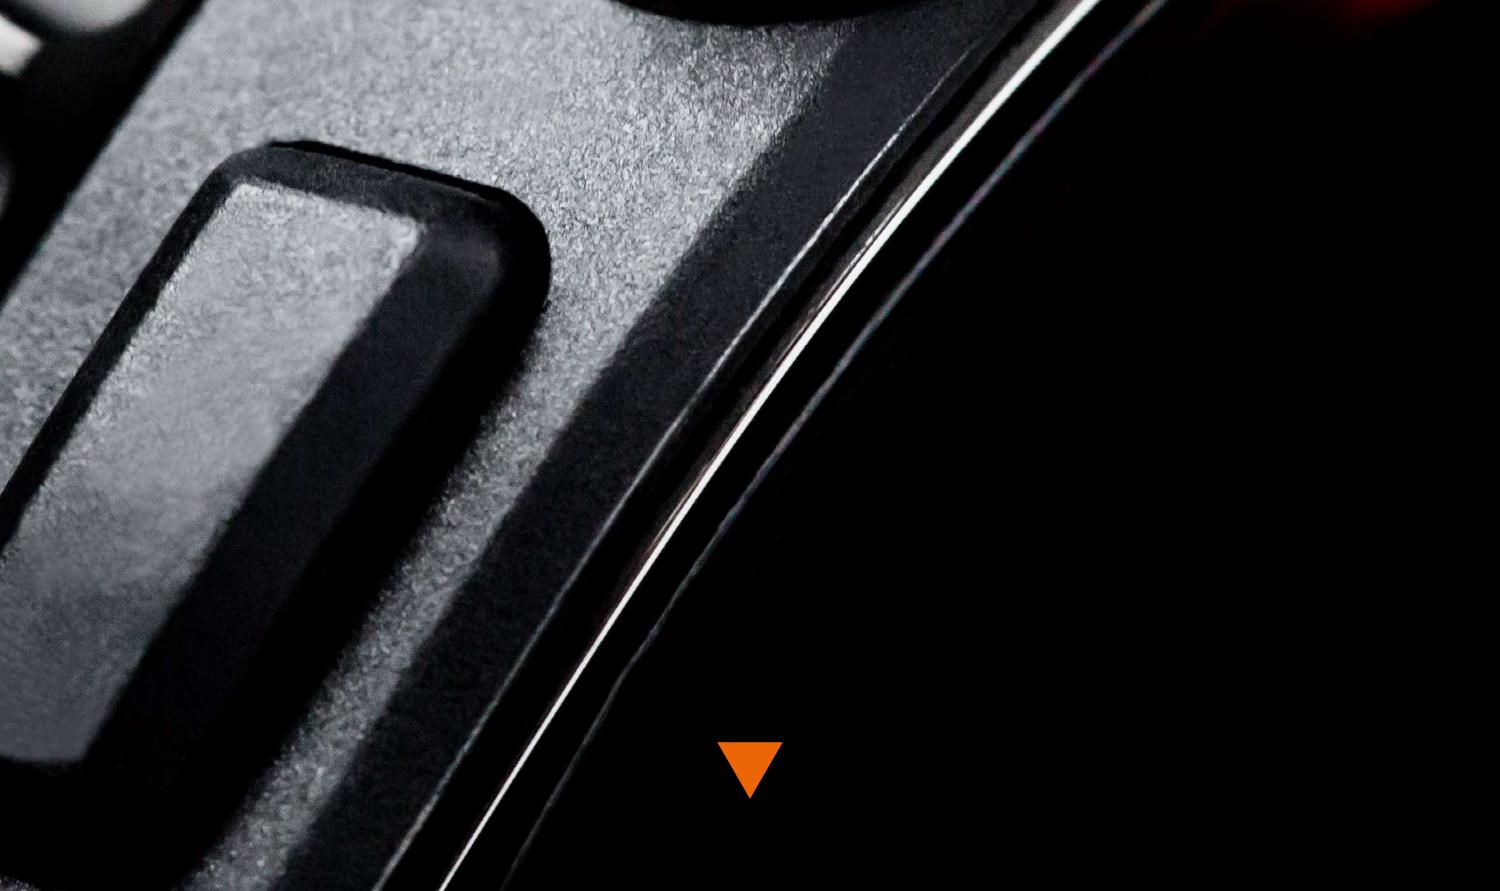

### CLOUD

Recover all of your data, even if you lose your watch or phone. The ALPINER**X** independently stores your activity and sleep up to 30 days without having to synchronise it to your smartphone. The Cloud is hosted in Switzerland.

#### **MESSAGES**

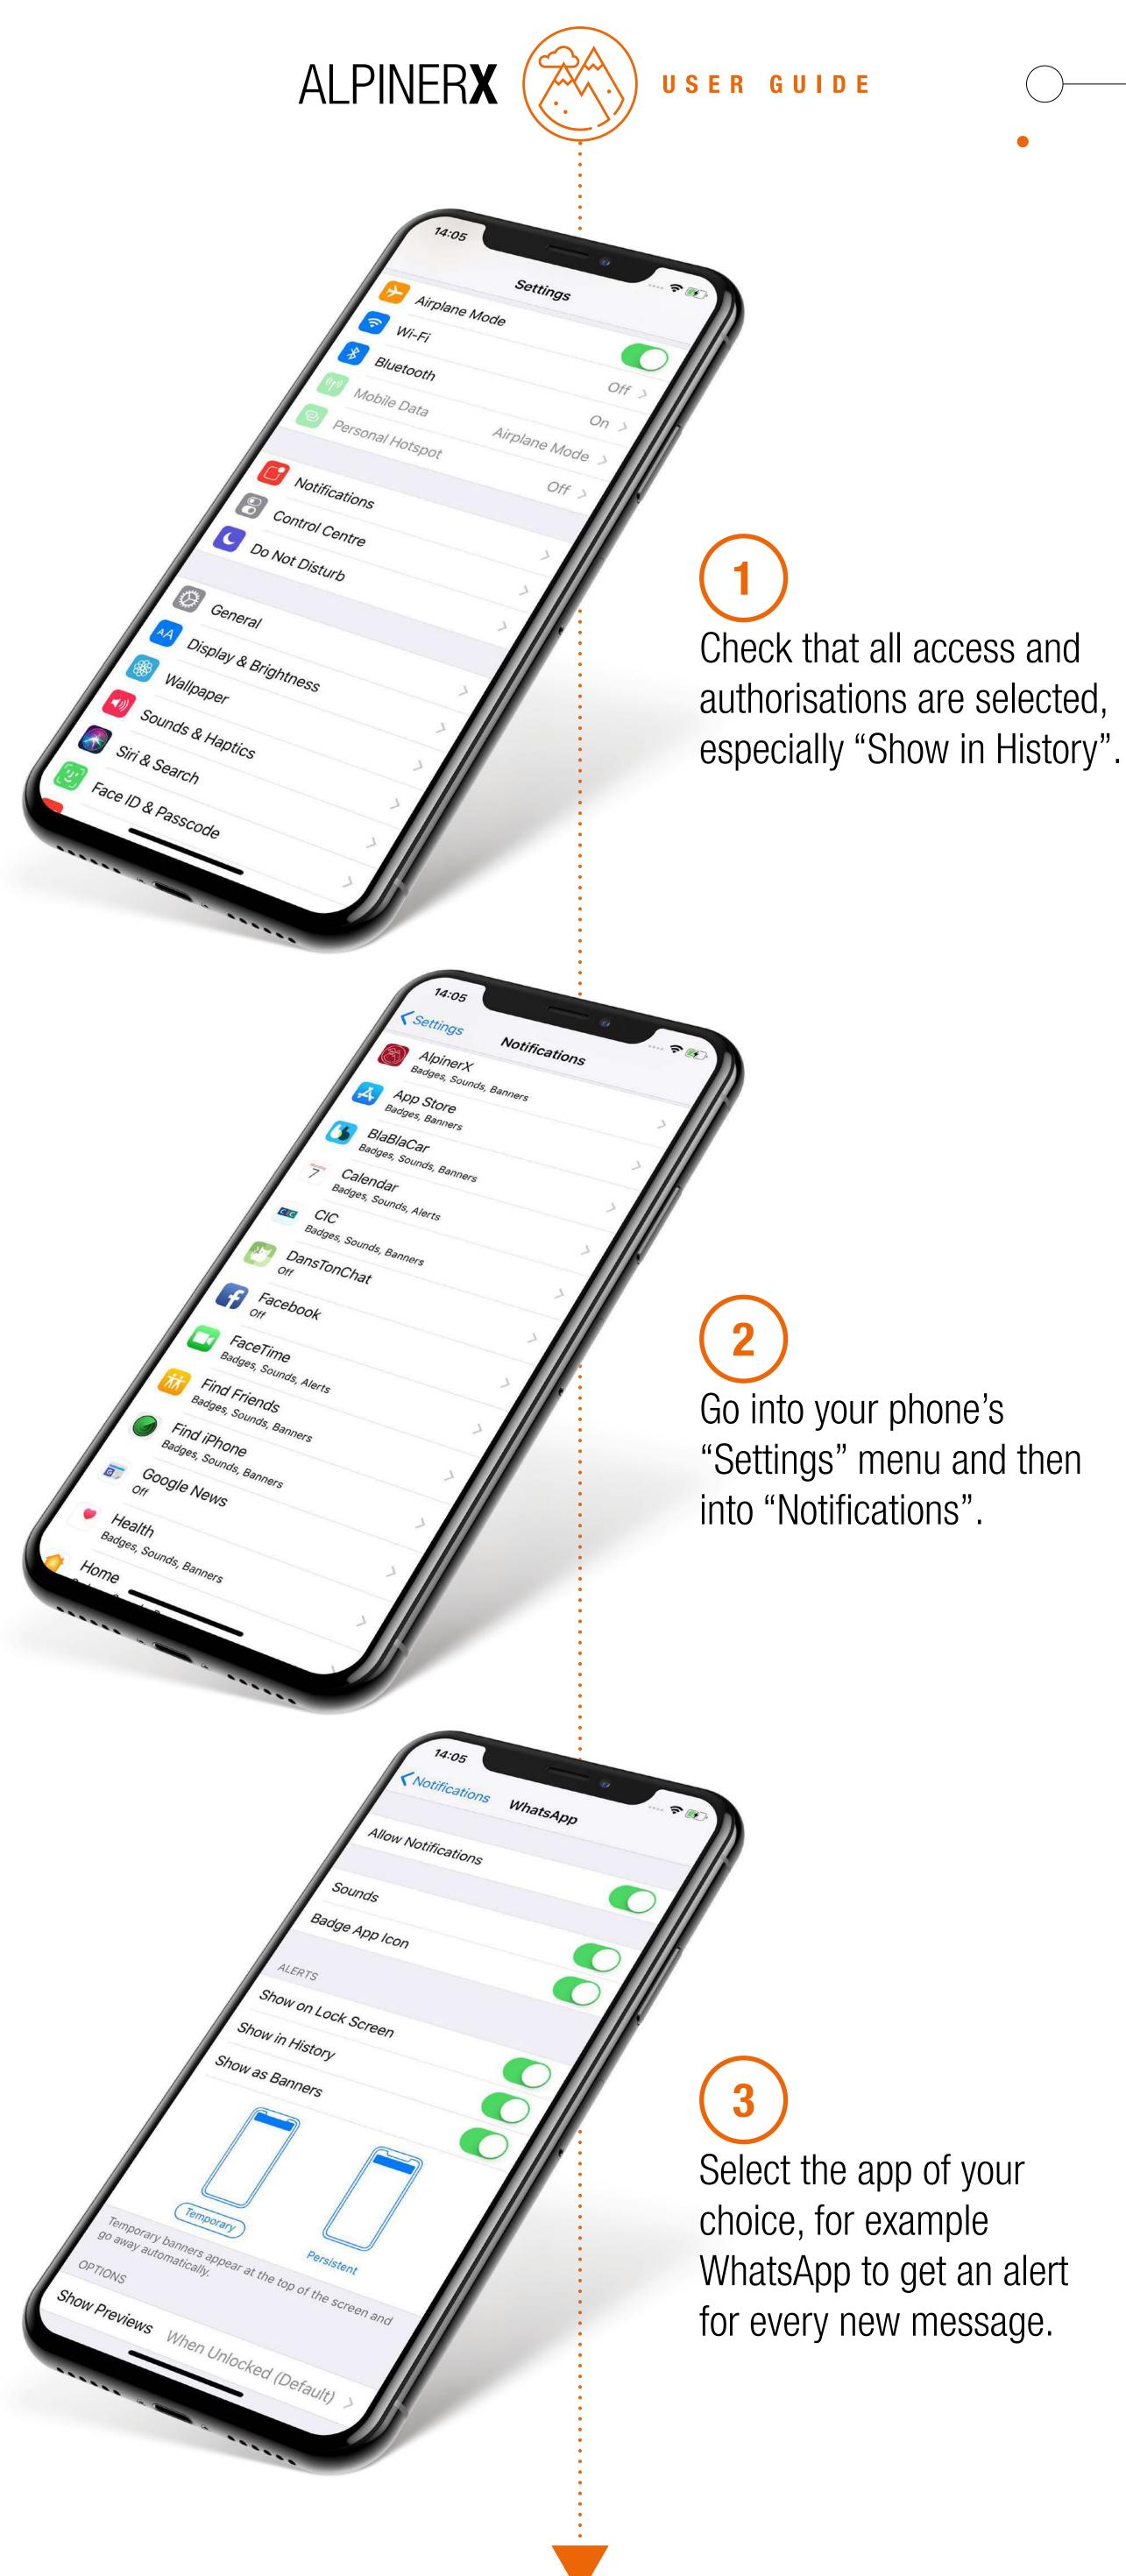

When a message is received, your watch will alert you with sound and a notification will appear on your watch.

#### CALLS

When an incoming call is detected, your watch will chime and a notification will be displayed on the screen of your watch.

own preferences. Notifications are indicated by the watch with a sound. The sound can be deactivated.

On top of calls, messages and e-mails, note that the ALPINER**X** offers a wide range of social media apps you can receive notifications for.

Go into your phone's "Settings" menu and then into "Notifications".

Select the app of your choice, for example WhatsApp to get an alert for every new message.

### HEART RATE MONITORING

The heart rate monitor (HRM) shows your heart rate in BPM (beats per minute) during a workout. To start a workout, you must pair an external HRM device with your watch through the application menu.

The workout starts when the external HRM device (chest belt for instance) starts to send valid data, while being worn. The workout stops once the external device is removed.

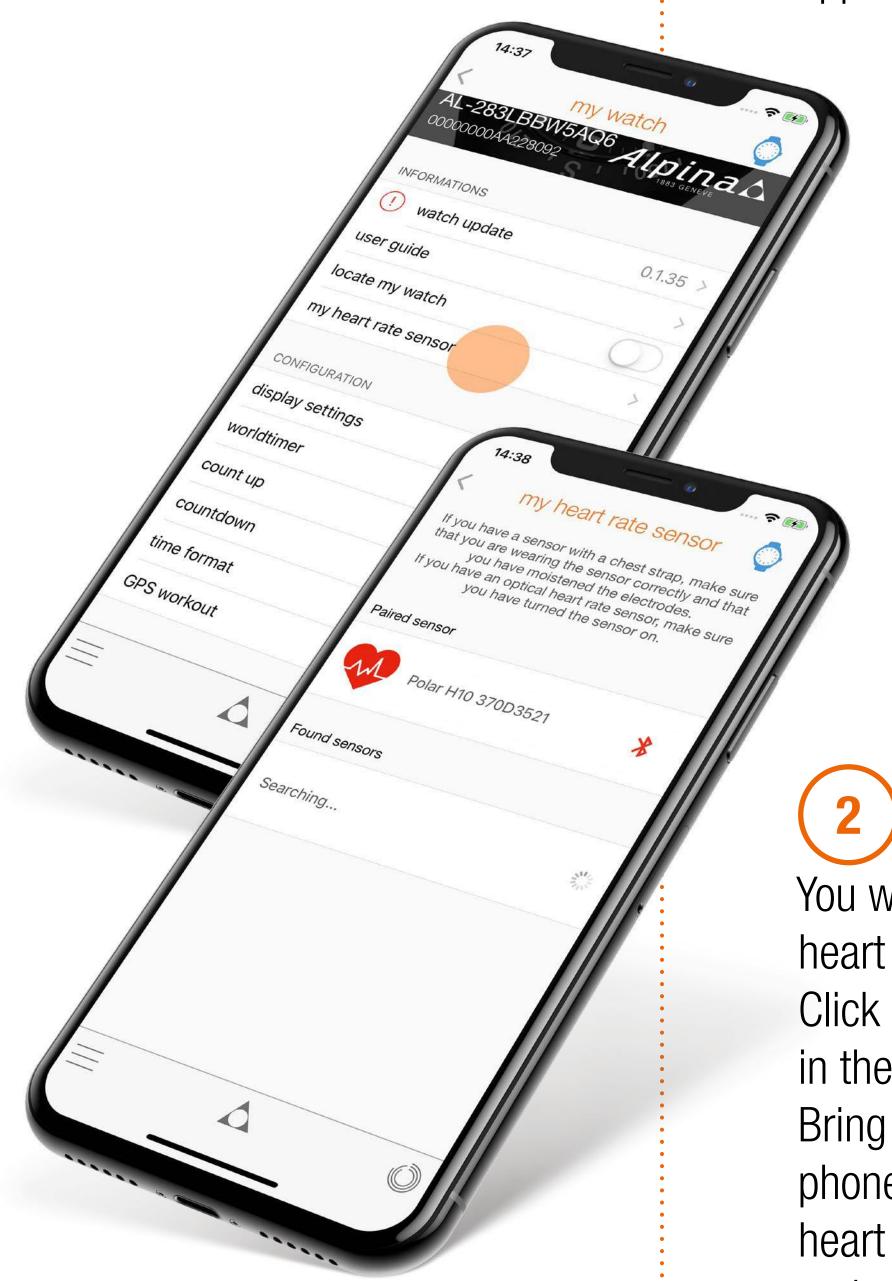

In the activity chart, you can select the HRM workout (heart icon) and see the details. The graph shows the HRM values during the workout, using 4 colors representing 4 different heart rate zones.

The different heart rate zones are displayed using your estimated maximum heart rate in BPM (beats per minute). Your maximum heart rate (HR max) is calculated with the common formula of 220 minus your age.

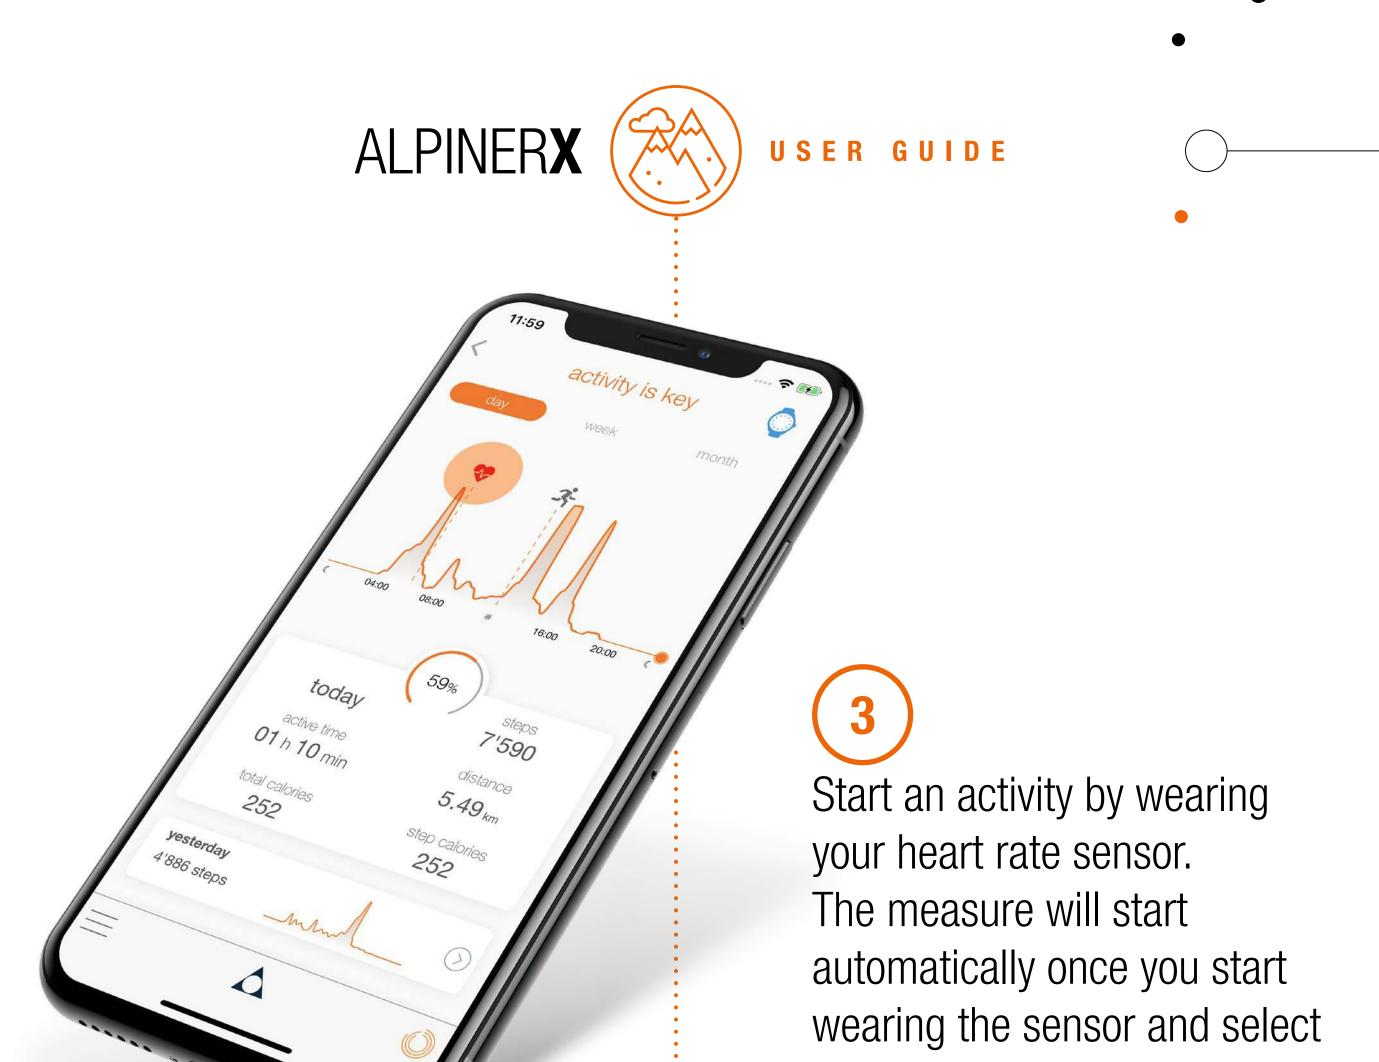

Make sure that your watch's firmware has been updated with the latest version available. Any new watch firmware update is provided by the app and will be indicated by a red dot next to "watch update" in "my watch". Click and follow the app's instructions.

You will now need to sync your

heart rate sensor to your watch. Click on "my heart rate sensor" in the app's main menu. Bring your sensor closer to your phone and select the detected heart rate device by clicking on its name in the list. Your heart rate monitoring system will be linked to your watch.

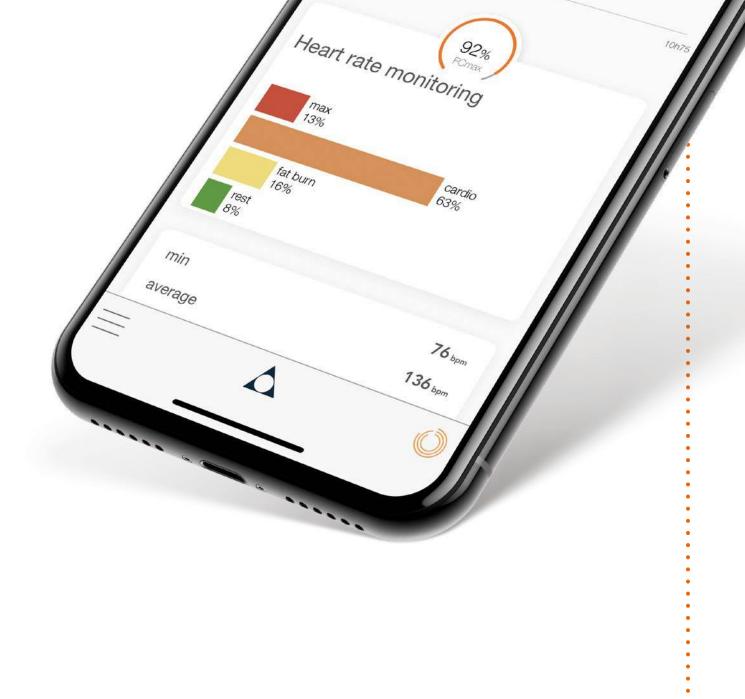

Heart rate monitoring

oday at 10:00

the heart rate function on your watch. It will stop upon removal of the device. You should be able to see the live BPM (beats per minute) values on your watch (data accessible by clicking on the AlpinerX's crown). At the end of your activity, open the app to sync your watch and retrieve your heart rate monitoring session in the activity chart.

The heart rate monitoring session is indicated by a small heart icon.

. .....

Click on the heart icon to display your heart rate monitoring session.

# LEGAL NOTICES ALPINERX USA CANADA EUROPE

### USA CANADA

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by

turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced technician for help.

This device complies with Part 15 of the FCC Rules and with Industry Canada license-exempt RSS standard(s). Operation is subject to the following two conditions:

- 1. this device may not cause harmful interference, and
- 2. this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications made to this equipment not expressly approved by Alpina Watch International SA and Manufacture Modules Technologies Sarl may void the FCC authorization to operate this equipment.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes:

- 1. l'appareil ne doit pas produire de brouillage, et
- 2. l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

Toute modification apportée à cet équipement non approuvée explicitement par Alpina Watch International SA et Manufacture Modules Technologies Sarl peut annuler l'autorisation de la FCC.
